SHIN-DLC

このブレードは両側面が凸面です、これは伝統的な日本刀で賞賛されている刃型です。この刃型は強くて良く切れ、枯れた竹を叩き切った後紙をスライス出来ます。この刃型を使うことによって切れ味を落とさずに刃を強靱にしています。これは良く切れるナイフです。長く切れ味の落ちないナイフをお楽しみ下さい。荒っぽく使われてもこの凸面の効果で食い込みを起こしません。他のナイフでは食い込みから引き抜く時しばしば刃欠けが起こります。

The blade is convex on both sides in the tradition of the highly praised Japanese sword. This shape is both sharp and strong, and can still can slice paper even after the punishment of beating and cutting through dried bamboo. Using this blade form is one superb method of making an edge thick without losing its sharpness. This is a knife of preeminent sharpness. You can enjoy its strong cutting capabilities for a long time. Even if used for rigorous cutting, the blade will not bite thanks to its convex shape. Other knives often will bite, and may nick if it is pulled out suddenly at that time.
